The American Council on Education, Institute for Innovative Global Education, and International Beliefs and Values Institute are pleased to offer a two-day training certification seminar on the Beliefs, Events, and Values Inventory (BEVI). The BEVI is a mixed-methods measure for assessing the impact of Collaborative Online International Learning (COIL) on intercultural competence and is facilitated through the COIL BEVI Project.

By the conclusion of the training, participants will be certified on the BEVI and will be able to use the measure for both research and applied purposes in order to evaluate and advance student learning, growth, and development as well as their COIL-based courses and programs.

This seminar is open exclusively to U.S. and Japanese higher education institutions participating in the U.S.-Japan COIL Initiative or Japan's Ministry of Education, Culture, Sports, Science, and Technology (MEXT) Inter-University Exchange COIL Project.
