What is the BEVI?

The Beliefs, Events, and Values Inventory or BEVI is an accessible, adaptable, and powerful analytic tool that may be used across multiple populations and settings – from education and research to leadership and mental health – to evaluate, understand, and facilitate processes and outcomes of learning, growth, and transformation.

BEVI Overview

- Based on over 30 years of research, theory and practice
- Normed upon an international sample (N = 10,000+)
- Measures core aspects of identity and self (e.g., development, needs, emotions, values)
- Assesses how and why humans change (e.g., on self / other awareness, critical thinking)
- Very strong psychometrics (e.g., excellent reliability / validity)
- Institutions and organizations can manage their own data, analyses, and reports
- Shows within group variation (e.g., avoids the dilemma of aggregation)
- Mixed methods approach
- Welcomes and integrates other approaches to assessment
- Emphasizes longitudinal analyses
- Used to facilitate “engaged,” “high impact,” and “transformative” learning

What does the BEVI measure?

The BEVI...is designed to assess a number of relevant processes and constructs including (but not limited to): basic openness; receptivity to different cultures, religions, and social practices; the tendency (or not) to stereotype in particular ways; self and emotional awareness; and preferred but implicit strategies for making sense of why 'other' people and cultures 'do what they do'

- Our beliefs and values shape our whole lives, from the way we work to how we interact with others.
- Beliefs and values deeply influence actions, policies, and practices, which can be helpful – or harmful – to us, others, and the larger world.
- The Beliefs, Events and Values Inventory (BEVI) is a powerful analytical tool that illuminates how we become who we are and why we do what we do.
- The BEVI is a practical resource used to solve real-world problems across multiple domains (eg, education, leadership, mental health, research, etc).
